NATURAL HAIR — CLARITY, CARE & CONFIDENCE

Do's & Don'ts Type 4 Hair

The habits that grow your crown — and the ones silently breaking it. The little guide to keep within reach.

6 DECISIVE MOMENTS

-  Wash day
-  Moisture
-  Styles & protection
-  Nighttime
-  Heat & tools
-  Habits

Wash without wrecking

Wash day is when your hair is at its most fragile — and when everything is decided.

DO ✓

- ✓ **Pre-poo** with oil before every shampoo
- ✓ Detangle **with fingers**, on conditioner-soaked hair
- ✓ Always work in **4-6 sections**
- ✓ Focus shampoo on the **scalp**
- ✓ Rinse **lukewarm**, finish cool

DON'T ✗

- ✗ Brushing or combing **dry** hair
- ✗ **Very hot** water (it lifts the cuticle and dries)
- ✗ Scrubbing the lengths like laundry
- ✗ Shampooing **every 2 days**
- ✗ Washing before detangling first

WHY IT MATTERS

80% of Type 4 breakage happens during washing and detangling. Slow this day down and your length changes within 3 months.

Hydrate for real

Dryness is Type 4 problem #1 – yet most “moisturizing” habits do not moisturize at all.

DO ✓

- ✓ Start with **WATER** (spritz, water-based leave-in)
- ✓ **Seal** afterwards with oil or butter
- ✓ A **deep conditioning** session every week
- ✓ Match L.O.C. / L.C.O. to your porosity
- ✓ Lightly re-hydrate **every day**

DON'T ✗

- ✗ Oiling **dry** hair and calling it moisture
- ✗ Stacking 5 “moisture” products without a drop of water
- ✗ Pure glycerin in **dry season**
- ✗ Skipping leave-in “to save time”
- ✗ Waiting for snapping sounds before acting

WHY IT MATTERS

Oil contains ZERO water: it seals what is already there. Without water first, you are sealing in... dryness.

Protect without strangling

A protective style that pulls is no longer protective — it is destructive.

DO ✓

- ✓ Braids/twists with **no tension** at the temples
- ✓ Moisturize and seal **before** styling
- ✓ Rotate styles and **tension points**
- ✓ Let your **edges** breathe
- ✓ Take styles down after **4–6 weeks** max

DON'T ✗

- ✗ **Too-tight** braids (“it will loosen up” = red flag)
- ✗ Extensions too **heavy** for your roots
- ✗ Elastics with **metal parts**
- ✗ Keeping a style **2-3 months** “to get your money’s worth”
- ✗ Restyling the same areas immediately

WHY IT MATTERS

Repeated traction at the temples can cause alopecia that is sometimes permanent. No hairstyle is worth your edges.

Protect while you sleep

8 hours of friction every night: nighttime builds — or destroys — your hair week.

DO ✓

- ✓ **Satin/silk** pillowcase or bonnet
- ✓ Night style: **pineapple**, loose twists or soft braids
- ✓ Light spritz + sealed ends **before bed**
- ✓ A bonnet **that fits** (not tight, not slipping off)

DON'T ✗

- ✗ Sleeping on **cotton** (it drinks your moisture)
- ✗ **Loose hair** rubbing all night long
- ✗ The bonnet whose elastic **saws at your edges**
- ✗ Going to bed with **soaking wet**, unprotected hair

WHY IT MATTERS

Cotton absorbs water and creates friction: one night can undo what your routine built all day.

Use heat without regrets

Heat is not forbidden — badly used heat is.

DO ✓

- ✓ Always a **heat protectant**
- ✓ **Low to medium** temperature (one pass only)
- ✓ Dry with a **cotton t-shirt** or a warm diffuser
- ✓ **Wide-tooth** comb; brushes only on damp, coated hair
- ✓ **Gentle** heat to boost treatments (steam cap)

DON'T ✗

- ✗ Flat-ironing or blow-drying **dirty or dry** hair
- ✗ Heat **every week**
- ✗ Multiple iron passes “to really straighten”
- ✗ Fine-tooth brushes on **dry** hair
- ✗ A scorching dryer pressed to the roots

WHY IT MATTERS

Heat damage is irreversible: a cooked curl never comes back. When in doubt, go 30 degrees lower.

Mind as much as hair

The best products will never beat good habits kept for 90 days.

DO ✓

- ✓ **One new thing** at a time, tested for 2 weeks
- ✓ Write down what works (tracker sheet)
- ✓ Judge over **90 days**, not 3
- ✓ Celebrate **retention** (less breakage = victory)
- ✓ Listen to YOUR hair, not the trends

DON'T ✗

- ✗ Copying a 4C influencer's routine **when you are 4A** (or vice versa)
- ✗ Changing everything **every week**
- ✗ Believing "3x growth in 1 month" promises
- ✗ Comparing your length to others'
- ✗ Quitting after the first bad week

WHY IT MATTERS

Average consistency beats occasional perfection. 90 days of simple habits are worth more than 9 miracle products.

The bathroom recap

The whole method on one page. Print it, stick it up, check it at a glance.

MOMENT	DO ✓	DON'T X
Wash day	Pre-poo + sections + fingers	Dry brushing / scalding water
Moisture	Water first, then seal	Oil alone on dry hair
Styles	No tension, 4-6 weeks max	Tight braids / metal elastics
Night	Satin + pineapple	Cotton + loose hair
Heat	Protectant + low temp	Weekly ironing, multi-passes
Habits	1 new thing / 2 weeks / 90 days	Constant change

THE MAGIC QUESTION

Before any move, ask yourself: "Does this hydrate, protect, or break?" Your hair only knows those three categories.

WHAT'S NEXT?

From right moves to a complete routine

You now know WHAT to do and what to avoid. The logical next step: understand why, and build YOUR routine.

★ RECOMMENDED FOR YOU

Why Nothing Works

You know the moves — now understand YOUR hair: porosity, density, scalp, and the routine that follows.
